Foreword

The Central Bank of Yemen is pleased to present the fifth Monetary and Financial Developments report covering recent developments through April 2022. The report will appear on a monthly basis, providing readers and researchers interested in monetary and financial developments in the Republic of Yemen with insights into major developments across the country's monetary and banking sectors. It will analyze key components of the Central Bank's balance sheet, the consolidated balance sheet of the commercial and Islamic banks, as well as monetary surveys. Budget deficit financing and domestic debt issuances will also be covered. Finally, there will be a special focus on exchange-rate and price developments.

We hope that this report will prove to be helpful for our readers.

God bless,

Ahmed Bin Ahmed Ghaleb
Governor, Central Bank of Yemen

Monetary and Financial developments

Money supply:

The money supply (M2) increased to 7229

billion Rials in 2021 compared to 6701 billion Rials in 2020, a YoY increase of 528 billion Rials (7.9 percent). The actual growth rate of broad money was well below the annual target of 18.3 percent as considered in the annual monetary plan. This indicated that monetary expansion in 2021 has been contained in line with the economic absorptive capacity.

Narrow money (M1) increased by 463.8 billion Rials YoY, while quasi-money rose by 84.7 billion Rials in 2021. The rise in narrow money reflected an increase in the currency in circulation and demand deposits. The upward trend in quasi-money was due to the increases in time and foreign deposits. The predominance of currency in circulation, which accounted for 49.4 percent of the total money supply in 2021 compared to 46.3 percent in 2020, is evidence that Yemen continues to rely heavily on cash as its primary means of financial intermediation.

Balance sheet of the CBY:

The total balance sheet of the CBY reached YER 8759.4 billion at the end of march 2022, showing a decrease for the year of YER 198.6 billion, or 2.2 percent.

The total foreign assets of the CBY record YER

1584.9 billion in april 2022 to YER 2055.9 billion in march 2022, a decrease of YER 471 billion (22.9 percent), mainly due to the positive effect of the allocation of special drawing rights (SDRs) by the International Monetary Fund (IMF) to Yemen in August 2021 (about USD 660 million).

Net credit to the government increased from YER 5220.8 billion at the end of march 2022 to YER 5395.9 billion at end of april 2022, an increased of YER 175.1 billion (3.4 percent).

The stock of currency issued by the CBY amounted to YER 3835 billion at the end of April 2022, compared with YER 3701.5 billion at the end of march 2022, a increase of YER 133.5 billion (3.6 percent).

Bank reserves held at the CBY decreased by YER 36.5 billion (5 percent) in november 2022.

Thus, base money (the sum of currency issued and bank reserves) decreased by 2.2 percent (YER 97 billion) in april 2022.

Consolidated balance sheet of commercial and Islamic banks:

The consolidated balance sheet of commercial and Islamic banks in Yemen totaled 4594.8 billion Rials in 2021, an increase of 165.1 billion Rials, or about 3.7 percent relative to 2020.

Bank loans and advances decreased by 1.8 billion Rials, or 0.1 percent in 2021, reaching 2303.6 bil-

lion Rials.

Total deposits increased, in 2021, by 144.2 billion Rials (about 4.1 percent) YoY to 3660.2 billion Rials. This increase reflected growth across several deposit categories: Demand deposits increased by almost 7% percent YoY, savings deposits by 4% percent, foreign deposits by 3.7% percent, and time deposits by 2.4 percent.

Clearing room:

The total number of checks transacted in rials in clearing rooms reached 1104 in april 2022, representing a total value of YER 16.1 billion, compared with 1224 checks totaling YER 10.1 billion during march 2022, an increase of 59.4% percent in quantity and 9.8% percent in value.

Exchange rates:

The average rate of the US dollar against the Yemeni Rial reached 963.56 Rials per US Dollar in april 2022, and 1246.52 Rials per Dollar at the end of march 2022. The peak was recorded in april 2021 (867.83 YER: 1 USD).

In response to these downward pressures and the accelerating depreciation of the Rial, the CBY took a series of regulatory and institutional adjustment actions designed to help restore stability in the FX market and enhance FX management guidelines and capacity. This process culminated with the launch of a best practice aligned FX auction mechanism, and subsequent implementation of weekly

FX live auctions since November 2021 using the Refinitiv electronic platform.

A single price system was used to allocate a maximum envelope of USD15 million for each auction. Adjusted to USD 20 million in mid-April 2022 per auction. This system enabled CBY conducting a competitive FX management process designed to ensure transparency and promote a robust price discovery mechanism. Adjudication prices were based on the marginal clearance price (for instance YER1,411/USD1 for the November 10th first auction). So far, the auctions have included participation of 3-8 banks each week, with an average of 3 bids per bank.

As of end april 2022, CBY offered 465 million USD in eighteen auctions. Total bids amounted to 380.4 million USD representing a coverage ratio of 80.8% percent. The total amount allocated was 333.6 million USD. These auctions enabled CBY absorb a total amount of 380.9 billion YER, equivalent to 8.4 percent of base money growth Until the end of april 2022. This constitutes an important step towards effective liquidity management using market-based monetary policy tools by CBY.

CBY maintained status quo on interest rates in CY 2022. In fact, the policy rate (the minimum rate on Rial deposits used as benchmark) was maintained

at the same rate of 15% since last cut in February 2013.

Public deficit financing:

Publish data on the actual implementation of the general budget For the state at the end of april 2022 to a surplus A cash amount of 577.6 billion riyals, amounting to Public revenues 671 billion riyals and expenditures The general public is 93.5 billion riyals, representing a surplus of about 97.7% of all public revenues. Versus incapacity A cash amount of 70 billion riyals , or 54% of the Total public expenditures at the end of march 2022.

The internal public debt has risen to record its value 3689.7 billion riyals in april 2022 compared to 3530.5 billion riyals march 2022 And the form of borrowing Direct from the central bank the main source of financing The internal public debt, to reach 3374 billion riyals in May 2022.

I registered his share of the debt The internal year was 94.6% in April 2022 The internal public debt instruments (deposits) were formed Power of attorney and certificates of deposit (second source of debt The internal year amounted to 306 billion riyals, and amounted to Its share of the total internal public debt is its percentage 5.4% in april 2022.

Prices and inflation:

Achieving price stability is the primary objective of monetary policy. The primacy of this objective is clearly stated in the Central Bank of Yemen (CBY)

Law No. 14 of 2000 that's why tremendous efforts

are being deployed by the central bank in concert with the relevant government entities and the assistance of the international community to face the persistent adverse macroeconomic conditions. In this regard, the CBY is proactively steering monetary policy in a manner designed to maintain macro-financial stability, while providing adequate financing to ensure that critical public financing needs are met.

The cost of the national minimum food basket (MFB) in Yemen — an indicator of the cost of living — reached 84,902 April 2022 compared to 96,414 Rials in March 2022 and 52,192 Rials in March 2021. This indicated that food prices Increased by 3.3 percent in April 2022 compared to January 2022, while the YoY food inflation amounted to 55.9 percent (April 2021 – April 2022).

To attain low and stable inflation, the CBY attaches great importance to controlling the money supply. This is achieved by constructing a solid framework for monetary targeting and adopting a comprehensive toolkit of indirect and market-based instruments for liquidity management.

Within this context, the monetary plan for 2022 projects broad and base money growth at 18% and 15.6%, respectively. Monetary emission is estimated to grow by 18.4%. These values are consistent with an inflation rate within a range from 15% to 20% during CY2022.

Statistical Concepts and Methodology

The monthly report on the most important financial, monetary and banking developments issued by the Central Bank of Yemen, starting from November 2021, focuses on the developments of the local financial and monetary economic conditions.

Here are the highlights of the report:

Money Aggregates and Monetary

Policy Developments:

The General Department for Research and Statistics collects these data and periodically prepares them for publication in accordance with the 2000 Monetary and Financial Statistics Manual issued by the IMF. The Central Bank treats the data it collected separately on the concerned institutions with strict confidentiality. The monetary data should be published in their final form, and these data are reviewed when any amendment is made related to the methodology used and the classification of the monetary data. The following is an introduction to the content of the most prominent terms included in the monetary tables:

- **Banks:** All commercial and Islamic banks operating in the Republic of Yemen that accept deposits.
- **Banking system:** The Central Bank of Yemen and the commercial and Islamic banks operating in Yemen.
- **Government:** The central government and the

local councils.

- **Social Security institutions:** The General Authority for Insurance and Pensions, the General Organization for Insurance and Pensions, and the security and military retirement Institutions.

- **Public institutions:** Public (non-financial) institutions and companies in which the government has an interest and/or voting power.

- **Non-governmental sector:** All local sectors except the government and social security institutions.

- **Resident:** A natural or legal person who usually resides in Yemen or has been in Yemen for one year or more, regardless of the nationality of this person, with the exception of international bodies and institutions and foreign students who reside for more than one year.

- **Non-resident:** A natural or legal person who usually resides outside Yemen and/or who has not completed one year of residency in Yemen, regardless of the nationality of this person, except for a family or individual who has an economic center or interest in Yemen and has permanent housing even if this family or individual resides in Yemen intermittently.

- **Net foreign assets:** The external assets of the banking system minus the external liabilities of the banking system, based on the concept of residen-

cy. These are calculated for the Central Bank and each other bank from the external assets and liabilities included in their balance sheets.

- **Net government borrowing:** The sum of the claims on the central government and local councils of the banking system, minus the total government deposits with the banking system.

- **Claims on the non-governmental sector:** The total claims on public institutions and the local private sector.

- **Other items net:** The sum of the other assets of the banking system minus the sum of other liabilities of the banking system, representing items that are not included in the definition of net foreign assets, net of government borrowing, and claims on the non-governmental sector from the Central Bank balance sheet and the consolidated balance sheet of commercial and Islamic banks.

- **Currency issued:** The cash issued by the Central Bank, consisting of cash circulating outside banks plus cash in banks' vaults.

- **Money:** Currency in circulation plus demand deposits in Rials with the banking system for both the (local) private sector and public institutions.

- **Quasi-money:** Both savings and time deposits in Rials and deposits in foreign currencies for all sectors mentioned in the definition of money with the banking system, in addition to deposits of so-

cial security institutions.

- **Money supply:** The sum of money plus quasi-money as well as the sum of net foreign assets, net government borrowing, claims on the non-governmental sector, and other items net.

- **Banks' deposits with the Central Bank include the following:**

- 1) **Reserve requirement:** The minimum value that banks must keep with the Central Bank to meet the mandatory reserve ratio imposed on deposits with banks.

- 2) **Current accounts:** Current accounts opened by banks with the Central Bank of Yemen in local and foreign currencies by banks. Certificates of deposit in Rials are not considered within these accounts.

- **Bank advances:** Credit granted by commercial banks in the form of loans, facilities, and discounted securities in addition to financing provided to Islamic banks for their investment operations.

- **Loans and advances granted to the private sector by banks:** Among others, direct loans and facilities granted by banks to the private sector and banks' investments in the shares of companies.

- **Loans and advances granted to the government by banks:** Agency deposits (alternatives to Islamic bonds), certificates of deposit gov-

ernment bonds.

• **Exchange rate and monetary policy:** The axis of the national currency exchange rates against the main foreign currencies is one of the axes that the Central Bank strives for its stability through effective monetary policy measures to achieve a macroeconomic balance between supply and demand and to curb price inflation. The General Administration of Foreign Exchange and Exchange Affairs is the source of these statements and procedures.

Public Finance:

The General Budget Department of the Central Bank of Yemen is the source of the state's general budget data, which is actual preliminary data. The budget data includes the following:

- **Total balance:** This represents the state's general budget and indicates the relationship between public revenues and overall public spending.
- **Internal public debt:** includes the financing provided by the banking system to the government to fill the deficit in the state's general budget.

Prices and Inflation:

The Food Security Secretariat of the Ministry of Planning and International Cooperation prepares the price index to measure the inflation rate based on (the cost of a food basket for an average family

of 7 to survive) with the help of its local and international partners. The food basket consists of 75 kg of flour, 10 kg of broad beans or red beans, 8 liters of imported vegetable oil, 2.5 kg of sugar, and 1 kg of iodized salt.

Disclaimer

- Starting in August 2008, monetary and banking data were modified and updated in accordance with the Monetary and Financial Statistics Manual issued by the International Monetary Fund for the year 2000. This note was developed to make it easier for researchers, observers and those interested to know the reasons for the change in numbers.
- According to Article (45) of the Central Bank Law No. (14) of 2000, all information and individual data provided to the Central Bank are strictly confidential and used only for statistical purposes, and no information that reveals the financial conditions of any bank or financial institution is published.
- The data contained in the report that we receive from its sources, such as ministries and government agencies, is preliminary data subject to change in the event that it is modified from its source.
- If it is not possible to obtain statistical data from ministries and government agencies, we are forced to take into account the expectations of the International Monetary Fund.
- This report is issued by the General Department for Research and Statistics in the Central Bank of Yemen - Headquarters Aden - Republic of Yemen.
